

CT600 Chereau Rear Door Lock Data Sheet

Closed position

Features:

- Designed and manufactured for the rear door locking system on Chereau box trailers June 2009 onwards.
- The enclosed outer sleeves slide over the door handles and the two halves are locked centrally. Distance to outside of handles = 825mm approx.
Width of box that fits over handles = 137mm
Depth of box = 20mm
- 75mm x 6mm case hardened steel arms offer a serious deterrent to thieves.
- Easily moved from trailer to trailer.
- Utilises the Bulldog highly developed 10 pin plunge lock, anti drill centre pin. Can be locked without the use of the keys. Over one million possible key combinations.
- Multiple locks can be supplied with the same key for fleet or multi user applications.
- Additional holes in lock arms for attachment of security seals.
